Special tool Tension tester**Tension tester**

- The tension testers reliably inspect whether the kraftband or ribbed belt is of the correct tension level.
- Particular Advantages : This simplified tension method is intended to simplify the maintenance of belt drives for the fitter in the event that the most important technical data is unknown and the ideal tension level is unavailable.
 1. Determine the section of your drive belt.
 2. Measure the diameter of the smaller pulley in the drive system.
 3. You will be able to find the appropriate tension from the table.
 4. Check the tension with the Optikrik according to the operating instructions.

Special tool Magnet tester**Magnet tester**

- The magnetic tester provides safe and simple checking for the presence of magnetism. Upon testing and without metallic contact, the lamp lights immediately where there is a magnetic field (e.g. an activated coil in a solenoid valve).
- Equipment can be tested without having to switch it off and magnetic coils can often be tested through their protective cover, saving hours of dismantling time.
- Powerful red light in the tip to indicate presence of a magnetic field
- Easy to use
- Solenoid valves in hydraulic control equipment can easily be tested
- Test relays with coils and electrically controlled solenoid valves in all types of machines
